Architect of the Capitol, Washington DC

Historic Preservation Contractor:

Dorma Inc, formerly Carolina Door, Columbia, MD

Door Systems Contractor:

tU.S. Bulletproofing Company, Inc., Hyattsville, MD

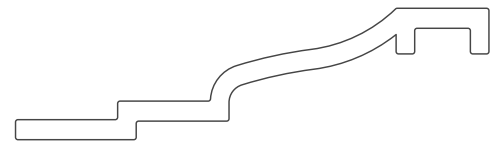

Site/Location:

U.S. Capitol Building, Washington DC

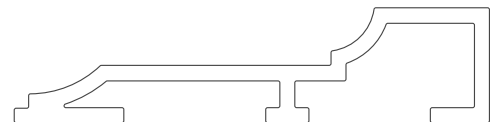

About This Project

Carolina Door and U S Bulletproofing utilized two brass extrusions to fabricate new doors for both the House and Senate entrances to the U.S. Capitol Building. These doors had to meet the historical renovation criteria as well as meet bullet-proof/ blast-proof requirements for government buildings. Bronze finish is oil rubbed.

Extrusions Used

K31394

K31395
